PAN AMERICAN
— SILVER —

THE WORLD'S PREMIER SILVER MINING COMPANY

INVESTOR PRESENTATION // JANUARY 2024

CAUTIONARY NOTE

Non-GAAP Measures

This presentation of Pan American Silver Corp. and its subsidiaries (collectively, “Pan American”, “Pan American Silver”, the “Company”, “we” or “our”) refers to various non-GAAP measures, such as “AISC”, “cash costs per ounce sold”, “adjusted earnings” and “basic adjusted earnings per share”, “total debt”, “capital”, “operating margin”, “free cash flow” and “working capital”. These measures do not have a standardized meaning prescribed by IFRS as an indicator of performance, and may differ from methods used by other companies. Silver segment Cash Costs and AISC are calculated net of credits for realized revenues from all metals other than silver, and are calculated per ounce of silver sold. Gold segment Cash Costs and AISC are calculated net of credits for realized silver revenues, and are calculated per ounce of gold sold. Consolidated Cash Costs and AISC are based on total silver ounces sold and are net of by-product credits from all metals other than silver.

Readers should refer to the “Alternative Performance (Non-GAAP) Measures” section of the Company’s Management’s Discussion and Analysis (“MD&A”) for the period ended September 30, 2023, available at www.sedarplus.com.

Reporting Currency and Financial Information

Unless we have specified otherwise, all references to dollar amounts or \$ are to United States dollars.

Cautionary Note Regarding Forward Looking Statements and Information

Certain of the statements and information in this presentation constitute “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 and “forward-looking information” within the meaning of applicable Canadian provincial securities laws. All statements, other than statements of historical fact, are forward-looking statements or information. Forward-looking statements or information in this presentation relate to, among other things: estimates of 2023 production figures, which remain subject to verification and adjustment, including our estimated production of silver, gold, and other metals in 2023; guidance for production, costs and certain expenditures in 2024, including, among other

things, production estimates for silver, gold and other metals, Cash Costs and AISC, estimates for and uses of sustaining and project capital, and anticipated costs associated with reclamation, general and administrative, care and maintenance activities, exploration and taxes; the ability of Pan American to successfully complete any capital projects, including the successful completion of construction and commissioning of the La Colorada ventilation infrastructure, and any economic or operational results expected to be derived therefrom; the ongoing impact of the ILO 169 consultation process in Guatemala; the exploration of any partnerships to develop the La Colorada Skarn project; the exploration of opportunities to enhance the LOM economics at La Colorada Skarn; estimates with respect to LOM, LOM operating costs, capital costs, sustaining capital, after-tax cash flow, NPV and after-tax IRR, payback period, production capacity and other metrics; that the current La Colorada vein mining operation would continue during the construction period; further exploration and infill drilling and the impacts on the La Colorada Skarn mineral resource estimate; and Pan American’s mineral resource and reserve estimates.

These forward-looking statements and information reflect Pan American’s current views with respect to future events and are necessarily based upon a number of assumptions that, while considered reasonable by Pan American, are inherently subject to significant operational, business, economic and regulatory uncertainties and contingencies. These assumptions include: tonnage of ore to be mined and processed; ore grades and recoveries; prices for silver, gold and base metals remaining as estimated; currency exchange rates remaining as estimated; capital, decommissioning and reclamation estimates; our mineral reserve and resource estimates and the assumptions upon which they are based; prices for energy inputs, labour, materials, supplies and services (including transportation); no labour-related disruptions at any of our operations; no unplanned delays or interruptions in scheduled production; all necessary permits, licenses and regulatory approvals for our operations are received in a timely manner; our ability to secure and maintain title and ownership to properties and the surface rights necessary for our operations; the ability to satisfy the closing conditions and, where necessary, receive regulatory approval, to complete the sale of the non-core assets; and our ability to comply with environmental, health and safety laws. The foregoing list of assumptions is not exhaustive.

Pan American cautions the reader that forward-looking statements and information involve known and unknown risks, uncertainties and other factors that may cause actual results and developments to differ materially from those expressed or implied by such forward-looking statements or information contained in this presentation and Pan American has made assumptions and estimates based on or related to many of these factors. Such factors include, without limitation: fluctuations in silver, gold and base metal prices; fluctuations

in prices for energy inputs, labour, materials, supplies and services (including transportation); fluctuations in currency markets (such as the PEN, MXN, ARS, BOB, GTQ, CAD, CLP, and BRL versus the USD); operational risks and hazards inherent with the business of mining (including environmental accidents and hazards, industrial accidents, equipment breakdown, unusual or unexpected geological or structural formations, cave-ins, flooding and severe weather); risks relating to the credit worthiness or financial condition of suppliers, refiners and other parties with whom Pan American does business; inadequate insurance, or inability to obtain insurance, to cover these risks and hazards; employee relations; relationships with, and claims by, local communities and indigenous populations; our ability to obtain all necessary permits, licenses and regulatory approvals in a timely manner; changes in laws, regulations and government practices in the jurisdictions where we operate, including environmental, export and import laws and regulations; changes in national and local government, legislation, taxation, controls or regulations and political, legal or economic developments in Canada, the United States, Mexico, Peru, Argentina, Bolivia, Guatemala, Chile, Brazil or other countries where Pan American may carry on business, including legal restrictions relating to mining, including in Chubut, Argentina, risks relating to expropriation, and risks relating to the constitutional court-mandated ILO 169 consultation process in Guatemala; diminishing quantities or grades of mineral reserves as properties are mined; increased competition in the mining industry for equipment and qualified personnel; and those factors identified under the caption “Risks Related to Pan American’s Business” in Pan American’s most recent form 40-F and Annual Information Form and those factors identified under the caption “Risks of the Business” in Yamana’s most recent form 40-F and Annual Information Form filed with the United States Securities and Exchange Commission and Canadian provincial securities regulatory authorities, respectively.” filed with the United States Securities and Exchange Commission and Canadian provincial securities regulatory authorities, respectively. Although Pan American has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated, described or intended. Investors are cautioned against undue reliance on forward-looking statements or information. Forward-looking statements and information are designed to help readers understand management’s current views of our near- and longer-term prospects and may not be appropriate for other purposes. Pan American does not intend, nor does it assume any obligation to update or revise forward-looking statements or information, whether as a result of new information, changes in assumptions, future events or otherwise, except to the extent required by applicable law.

NOT AN OFFER OR A SOLICITATION

THIS PRESENTATION DOES NOT CONSTITUTE (AND MAY NOT BE CONSTRUED TO BE) A SOLICITATION OR OFFER BY PAN AMERICAN OR ANY OF OUR RESPECTIVE DIRECTORS, OFFICERS, EMPLOYEES, REPRESENTATIVES OR AGENTS TO BUY OR SELL ANY SECURITIES OF ANY PERSON IN ANY JURISDICTION, OR A SOLICITATION OF A PROXY OF ANY SECURITYHOLDER OF ANY PERSON IN ANY JURISDICTION, IN EACH CASE, WITHIN THE MEANING OF APPLICABLE LAWS.

Technical Information

Scientific and technical information contained in this presentation has been reviewed and approved by Christopher Emerson, FAusIMM., Vice President of Exploration and Geology, and Martin Wafforn, P.Eng., Senior Vice President Technical Services and Process Optimization, who are each Qualified Persons for the purposes of National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101").

For additional information regarding Pan American Silver's material mineral properties prior to the completion of the acquisition of Yamana (the "Yamana Transaction"), please refer to Pan American Silver's Annual Information Form dated February 22, 2023, filed at www.sedarplus.com, or Pan American Silver's most recent Form 40-F filed with the SEC. For further information about the material mineral projects acquired pursuant to the Yamana Transaction, please refer to Yamana's Annual Information Form dated March 29, 2023, filed at www.sedarplus.com or Yamana's most recent Form 40-F filed with the SEC.

Cautionary Note to U.S. Investors Concerning Estimates of Mineral Reserves and Resources

Unless otherwise indicated, all reserve and resource estimates included in this presentation have been prepared in accordance with Canadian National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") and the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") — CIM Definition Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as amended (the "CIM Standards"). NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Canadian standards, including NI 43-101, differ significantly from the requirements of the SEC, and reserve and resource information included herein may not be comparable to similar information disclosed by U.S. companies. In particular, and without limiting the generality of the foregoing, this presentation uses the terms "measured resources," "indicated resources" and "inferred resources" as defined in accordance with NI 43-101 and the CIM Standards.

Further to recent amendments, mineral property disclosure requirements in the United States (the "U.S. Rules") are governed by subpart 1300 of Regulation S-K of the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act") which differ from the CIM Standards. As a foreign private issuer that is eligible to file reports with the SEC pursuant to the multi-jurisdictional disclosure system (the "MJDS"), Pan American is not required to provide disclosure on its mineral properties under the U.S. Rules and will continue to provide disclosure under NI 43-101 and the CIM Standards. If Pan American ceases to be a foreign private issuer or loses its eligibility to file its annual report on Form 40-F pursuant to the MJDS, then Pan American will be subject to the U.S. Rules, which differ from the requirements of NI 43-101 and the CIM Standards.

Pursuant to the new U.S. Rules, the SEC recognizes estimates of "measured mineral resources", "indicated mineral resources" and "inferred mineral resources." In addition, the definitions of "proven mineral reserves" and "probable mineral reserves" under the U.S. Rules are now "substantially similar" to the corresponding standards under NI 43-101. Mineralization described using these terms has a greater amount of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, U.S. investors are cautioned not to assume that any measured mineral resources, indicated mineral resources, or inferred mineral resources that Pan American reports are or will be economically or legally mineable. Further, "inferred mineral resources" have a greater amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Under Canadian securities laws, estimates of "inferred mineral resources" may not form the basis of feasibility or pre-feasibility studies, except in rare cases. While the above terms under the U.S. Rules are "substantially similar" to the standards under NI 43-101 and CIM Standards, there are differences in the definitions under the U.S. Rules and CIM Standards. Accordingly, there is no assurance any mineral reserves or mineral resources that Pan American may report as "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had Pan American prepared the reserve or resource estimates under the standards adopted under the U.S. Rules.

DIVERSIFIED ASSETS + GROWTH CATALYSTS

// Pan American's portfolio offers scale & quality in the Americas, where we have been operating for nearly 3 decades

- **11 producing mines**
- **2 catalysts** with potential for material growth: Escobal & La Colorada Skarn
- Large silver & gold mineral **reserves**
- Extensive **exploration portfolio**

Revenue by Jurisdiction →

PRELIMINARY 2023 PRODUCTION⁽¹⁾

	Silver Production (thousand ounces)		Gold Production (thousand ounces)	
	Q4 2023	FY 2023	Q4 2023	FY 2023
Silver Segment:				
La Colorada (Mexico)	806	4,392	0.4	2.3
Cerro Moro (Argentina)	886	3,547	30.3	84.6
Huaron (Peru)	905	3,608	0.2	1.1
San Vicente (Bolivia) ⁽²⁾	738	2,978	--	0.1
Manantial Espejo (Argentina) ⁽³⁾	--	191	--	1.7
Gold Segment:				
Jacobina (Brazil)	--	--	51.1	147.8
El Peñon (Chile)	853	2,906	33.9	95.7
Timmins (Canada) ⁽⁴⁾	4	16	35.1	132.9
Shahuindo (Peru)	69	276	34.9	140.1
La Arena (Peru)	17	47	31.7	97.1
Minera Florida (Chile)	80	283	24.7	72.4
Dolores (Mexico)	477	2,194	25.4	107.1
Total	4,835	20,437	267.8	882.9

(1) The FY 2023 production results reflect the nine-month period from March 31, 2023 to December 31, 2023 for the acquired Yamana mines and the full 12-month period of 2023 for the original Pan American operations.

(2) San Vicente data represents Pan American's 95.0% interest in the mine's production.

(3) Mining activities were completed at Manantial Espejo at the end of 2022, with residual processing completed in January 2023.

(4) The Timmins operation is comprised of the Timmins West and Bell Creek mines and the Bell Creek mill, together "Timmins".

2024 GUIDANCE

// forecasting an increase in silver and gold production relative to 2023 and strong performance on costs⁽¹⁾

Ag

21.0 – 23.0 Moz

ANNUAL CONSOLIDATED
PRODUCTION

\$11.70 – \$14.10 per oz

SILVER SEGMENT CASH COSTS¹

\$16.00 – \$18.50 per oz

SILVER SEGMENT AISC¹

Au

880 – 1,000 Koz

ANNUAL CONSOLIDATED
PRODUCTION

\$1,165 – \$1,260 per oz

GOLD SEGMENT CASH COSTS¹

\$1,475 – \$1,575 per oz

GOLD SEGMENT AISC¹

Note: Please refer to the forward-looking cautionary language on pages 2 and 3 of this presentation.

1. Cash Costs and AISC are non-GAAP measures. Please refer to the section “Alternative Performance (Non-GAAP) Measures” of the MD&A for the period ended September 30, 2023 for a detailed description of these measures. The AISC forecast assumes metal prices of \$23.50/oz for silver, \$1,950/oz for gold, \$2,500/tonne (\$1.13/lb) for zinc, \$2,150/tonne (\$0.98/lb) for lead, and \$8,300/tonne (\$3.76/lb) for copper; and average annual exchange rates relative to 1 USD of 17.50 for the Mexican peso, 3.75 for the Peruvian sol, 980.00 for the Argentine peso, 7.00 for the Bolivian boliviano, \$1.36 for the Canadian dollar, 850.00 for the Chilean peso and 5.00 for the Brazilian real.

STRONG FINANCIAL POSITION⁽¹⁾

- ✓ ~\$90M in annual savings from lower care & maintenance costs and reduced interest expense + ~40-60M annually in synergy savings from Yamana transaction
- ✓ **Total debt⁽²⁾ of \$809.1M** related to senior notes and construction loans & leases
 - \$283M with 4.625% coupon maturing in December 2027
 - \$500M with 2.63% coupon maturing in August 2031
- ✓ **Sustainability-Linked Revolving Credit Facility** aligns Pan American's ESG performance to its cost of capital

1. As at September 30, 2023.
2. Total debt is a non-GAAP measure calculated as the total of amounts drawn on the SL-Credit Facility, finance lease liabilities and loans payable. See the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation.
3. Total Available Liquidity is a non-GAAP measure calculated as cash and cash equivalents plus short-term investments, plus undrawn amounts under the SL-Credit Facility.

LA COLORADA VENTILATION INFRASTRUCTURE

// significant improvement in mine operating conditions expected following completion mid 2024

The fully concrete-lined 5.5-metre diameter ventilation shaft was completed in 2023.

Ventilation fans to be installed on shaft by mid-2024.

NEW VENTILATION SHAFT

This infrastructure is strategically located to exhaust hot, humid air directly from the hottest areas of the mine.

Once completed, the ventilation circuit will be more efficient with air entering in the West and Center of the Candelaria zone of the mine and exhausting in the East. This is expected to increase air flow and reduce temperature and humidity, enabling access to higher grade zones of the mine and higher throughput.

ZACATECAS, MEXICO

LA COLORADA SKARN PROJECT⁽¹⁾

// Preliminary Economic Assessment Highlights

- Production averaging 17.2 million ounces of silver, 427 thousand tonnes of zinc and 218 thousand tonnes of lead annually during the first 10 years
- 50,000 tonnes per day sub-level cave mine and conventional flotation plant
- 17-year mine life and continued exploration upside, with more than 40,000 metres of recent drilling not included in current mineral resource estimate
- After-tax net present value (8%) of \$1,087 million, 14% after-tax internal rate of return, and payback period of 4.3 years estimated using long-term prices of \$22 per ounce of silver, \$2,800 per tonne of zinc, and \$2,200 per tonne of lead

LA COLORADA SKARN PROJECT, MEXICO

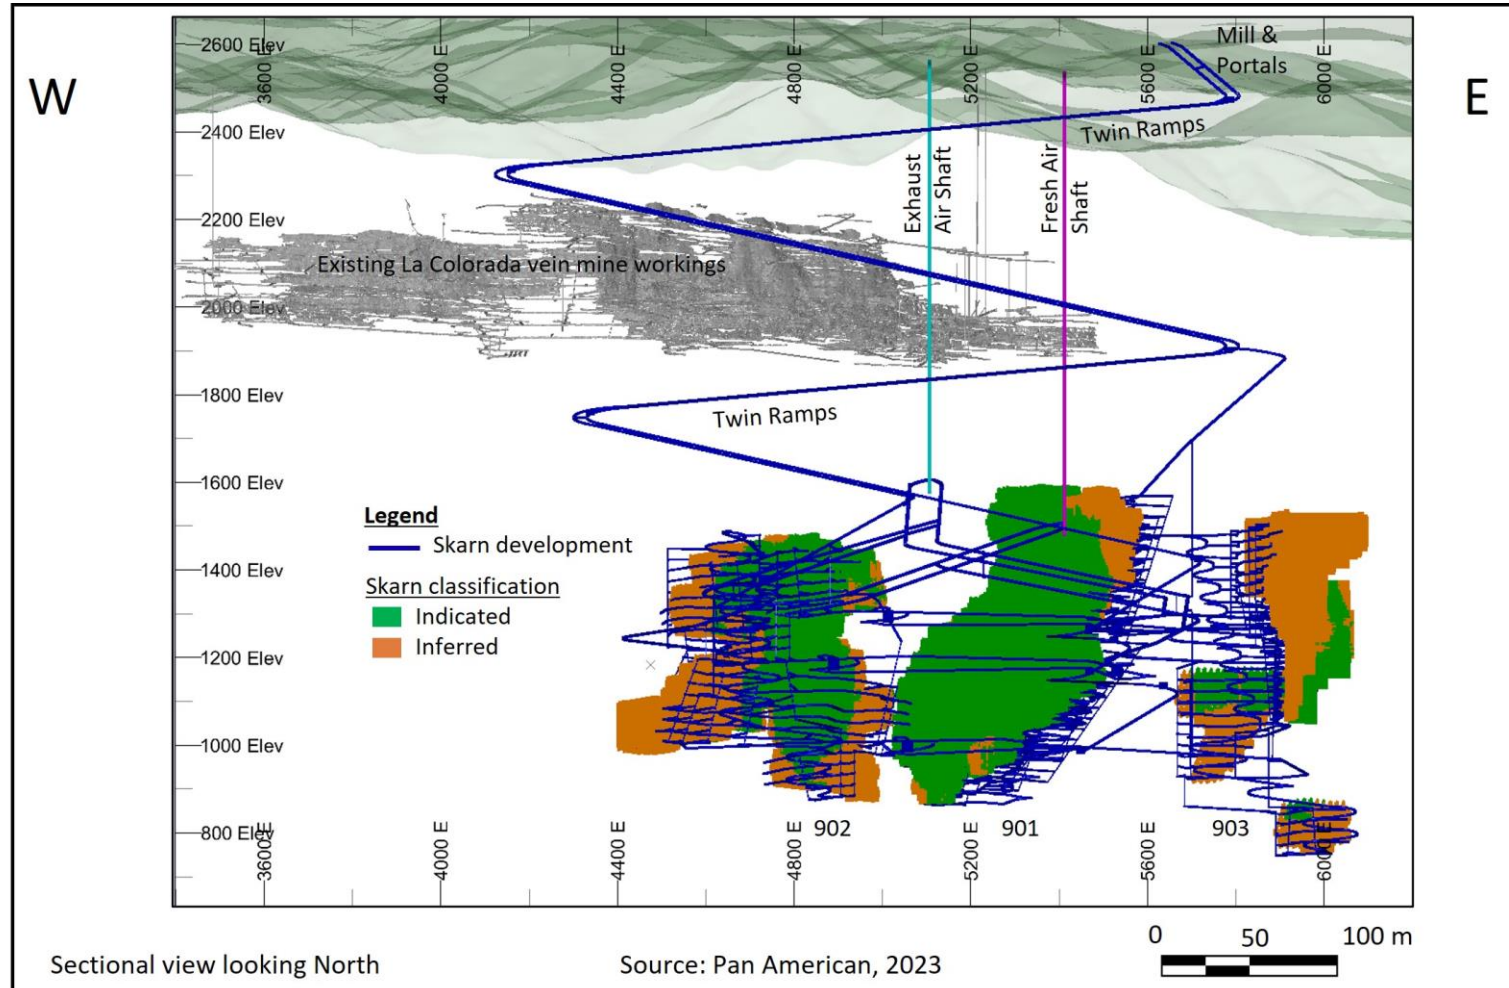

EXPLORING LONG-TERM PARTNERSHIPS TO DEVELOP THE PROJECT

(1) Please refer to our news release dated December 18, 2023 for Pan American's announcement of the Preliminary Economic Assessment of the La Colorada Skarn project.

LA COLORADA SKARN VIEWS⁽¹⁾

// polymetallic skarn mineralisation is concentrated in 3 zones, covering an area of 1,500 metres by 1,100 metres laterally, and a depth of between 600 metres and 1,900 metres below surface

(1) Please refer to our news release dated December 18, 2023 for Pan American's announcement of the Preliminary Economic Assessment of the La Colorado Skarn project.

SANTA ROSA, GUATEMALA

ESCOBAL

// One of the world's best silver mines

- High-quality, well-built operation with over US\$500 million invested⁽¹⁾
- One of the world's largest primary silver deposits with reserves of 264 Moz
- 3 consecutive years of production at 20 Moz Ag/year at AISC consistently below US\$10/oz Ag prior to 2017
- Mine operations suspended pending completion of an ILO 169 consultation by the Guatemalan government

1. Based on development, expansion, and sustaining capital invested from 2011 to 2017.

Historical Silver Production & AISC

AISC is a non-GAAP measure; see the "Non-GAAP Measures" section of our Cautionary Note on page 2 of this presentation.

Mineral Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (Moz)	Au (koz)	Pb (kt)	Zn (kt)
P&P Reserves	24.7	334	0.35	0.79	1.30	264.5	278	196	320
M&I Resources	16.5	208	0.21	0.37	0.65	110.1	110	61	106
Inferred Resources	1.9	180	0.90	0.22	0.42	10.7	54	4	8

(as of June 30, 2023)

See presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.

ESCOBAL CONSULTATION PHASE UNDERWAY

// Escobal mining license suspended pending completion of an ILO 169 Consultation in Guatemala

For more information, please visit
<https://mem.gob.gt/derecho-minero-escobal/>

PRE-PHASE 1 REVIEW

PAS Guatemala shall work with 2011 Environmental Impact Study (EIS) consultant and experts at two Guatemalan Universities to review, define, and recommend area of influence (AOI) to Ministry of Environment and Natural Resources

MARN (Environmental Ministry) completed the area of influence analysis and submitted to the MEM in November 2018. On February 5, 2020, the Supreme Court ruled that the MARN process for the determination of the AOI was completed properly.

PHASE 1 PRE-CONSULTATION

Ministry of Energy and Mines (MEM) leads the process

Define and agree to the terms, timeline and mechanisms under which the consultation (Phase 2) will take place

Pre-consultation completed in July 2022.

PHASE 2 CONSULTATION

MEM leads the process

Formal dialogue process to achieve agreements amongst the main participants in the process: Xinka indigenous communities, MEM and PAS Guatemala (Pan American's subsidiary in Guatemala)

Underway.

PHASE 3 SUPREME COURT VERIFICATION

MEM to submit results of the consultation process to the Guatemalan Supreme Court (SC)

SC certifies with all three parties that the ILO 169 consultation process as outlined in the Constitutional Court's resolution has been followed

Awaiting completion of Phase 2.

THE WORLD'S PREMIER SILVER MINING COMPANY

→ The “go-to” name for investing in silver

Large silver reserves⁽¹⁾

Proven and probable mineral reserves of 486.8 Moz plus measured and indicated mineral resources of 945.0 Moz, as of June 30, 2023

Escobal mine has potential to add ~20 Moz of silver production annually following restart of operations⁽²⁾

The mine is currently on care and maintenance pending completion of an ILO 169 Consultation by the government of Guatemala

La Colorada Skarn estimated to contain 183 Moz of silver indicated mineral resource and 116 Moz inferred mineral resource⁽³⁾

Pan American advancing the project through continued infill and exploration drilling and exploring opportunities to partner in the development

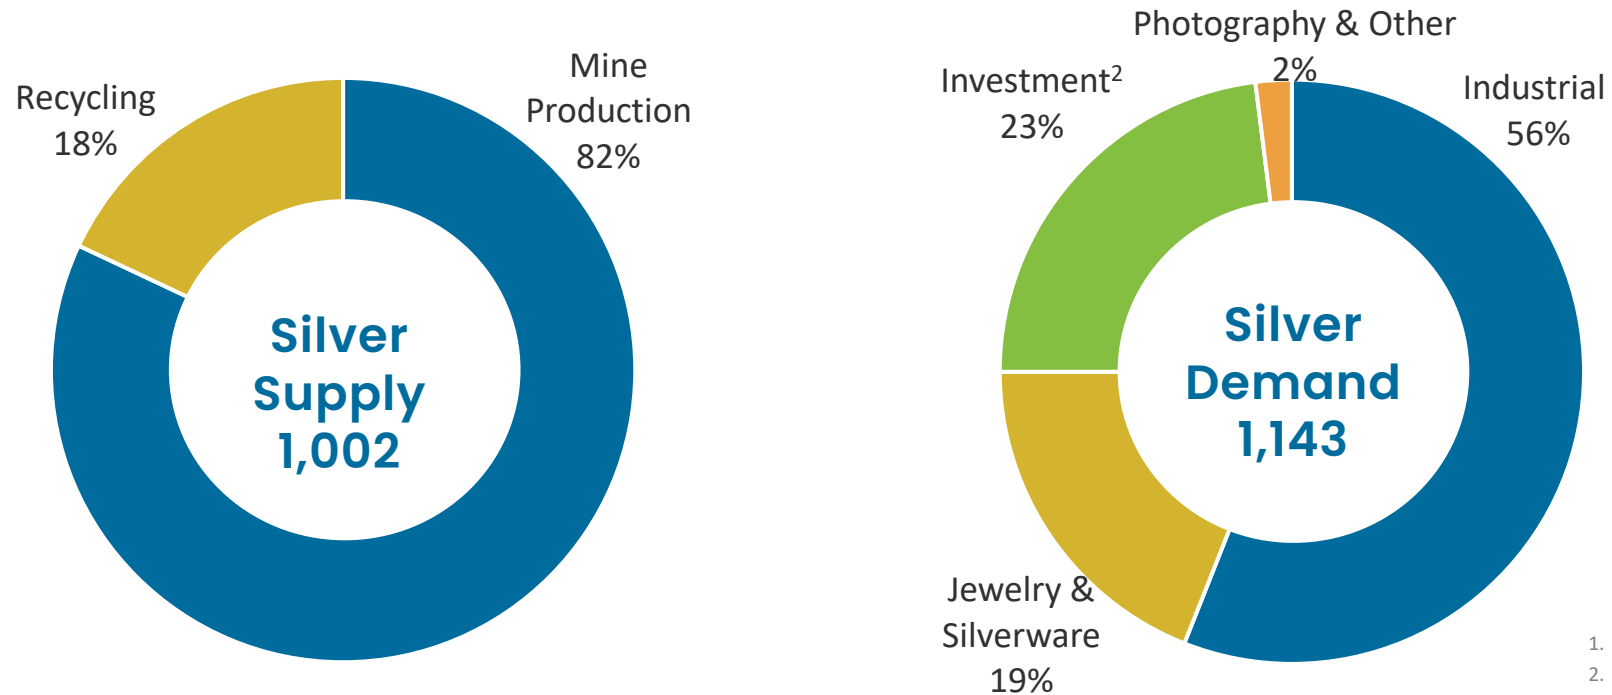

Preferred investment for silver mining investors

Transaction created the world's premier silver mining company with average daily trading liquidity of ~\$50M⁽³⁾ and a market capitalization of \$5.0B⁽⁴⁾

1. Pan American estimated mineral reserves and resources reported as of June 30, 2023, updated to reflect the sales of MARA (completed on Sept. 20, 2023), Morococha (completed on Sept. 22, 2023), and Jeronimo (completed on Nov. 6, 2023). See presentation Appendix for more detailed information on the Company's reserves and resources.
2. The Escobal mine produced 20 Moz Ag/year for 3 consecutive years prior to the mine's suspension in 2017.
3. The effective date of the mineral resource estimate is December 15, 2023; See presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.
4. Based on FactSet 90-day average trading volume as of January 19, 2024.
5. FactSet market data as of January 19, 2024.

WORLD SILVER SUPPLY & DEMAND

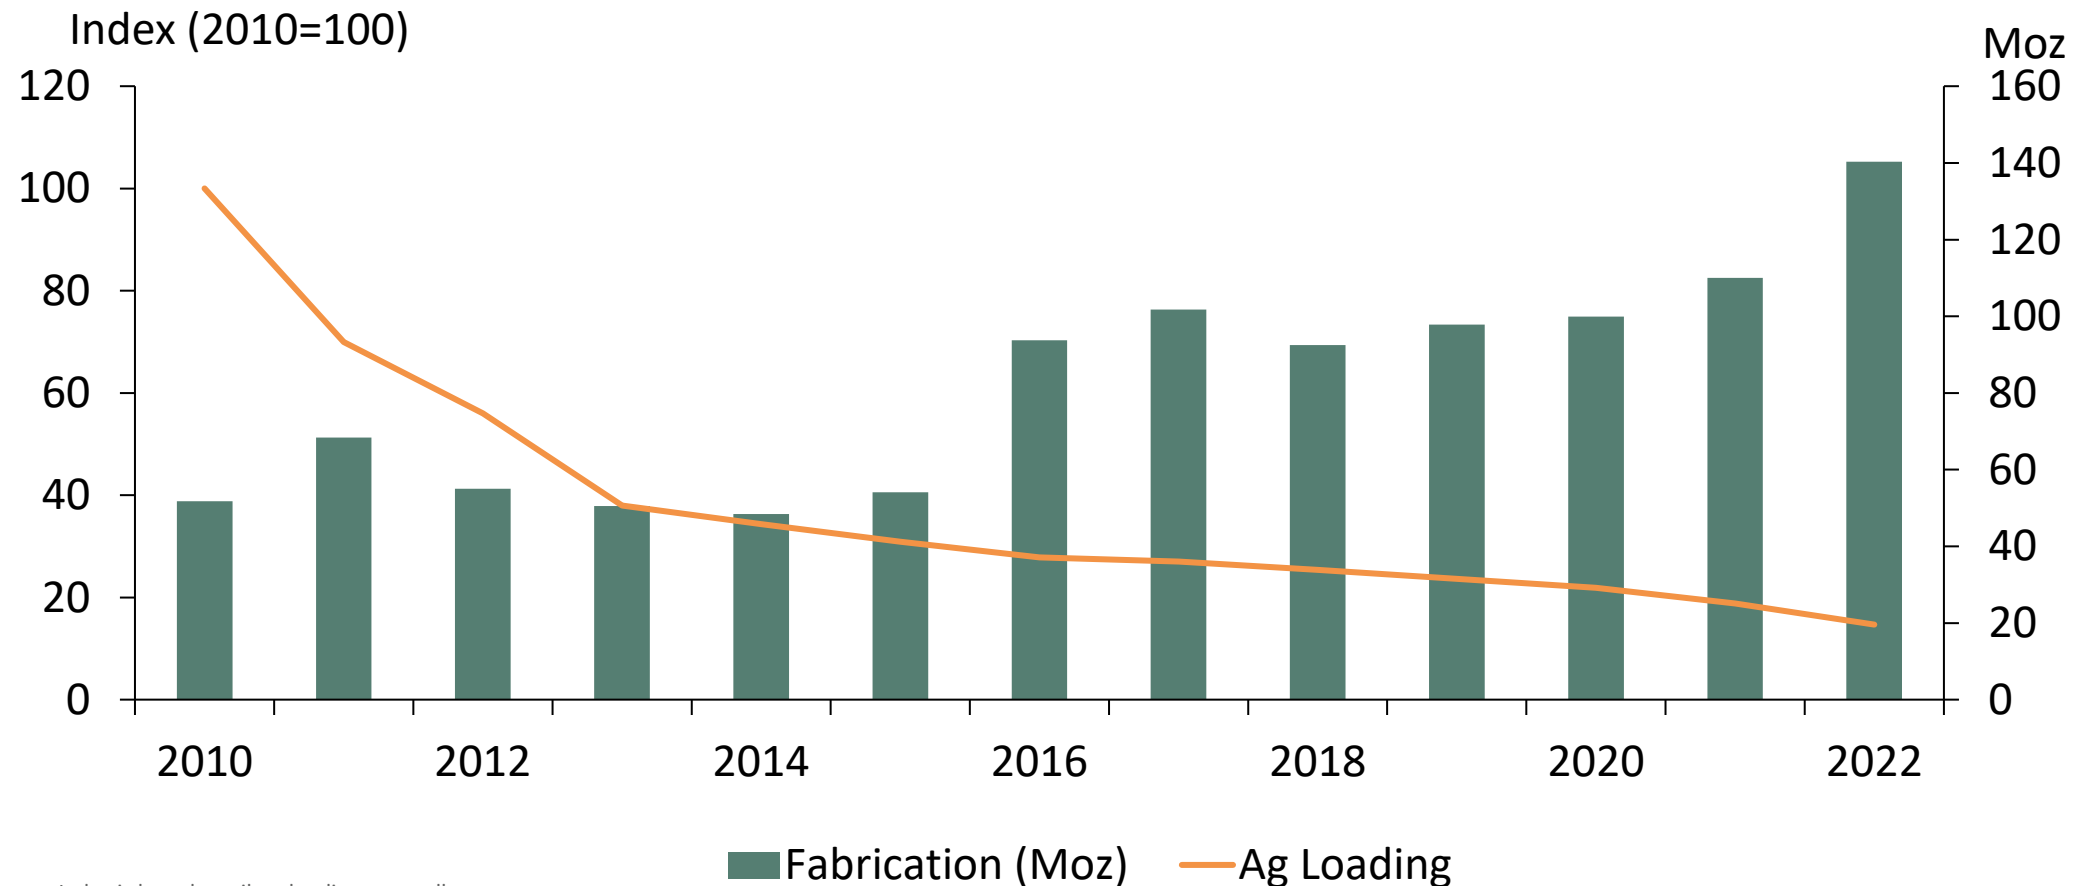

// 2023 estimate⁽¹⁾; in million ounces

~ 140 Moz supply shortfall estimated for 2023, marking the 3rd consecutive year of physical deficit, from record high industrial demand in 2023

PHOTOVOLTAIC DEMAND

// Silver demand for solar installations has grown, representing 140 Moz, or ~11% of total demand, in 2022 while thrifting has plateaued

Index is based on silver loadings per cell.
Source: Metals Focus, April 2023

SILVER: METAL OF THE FUTURE

// Growing industrial demand from global transition to decarbonization and electrification

- Silver has the highest electrical and thermal conductivity of all metals, making it an important metal in the transition to a low carbon economy.
- ~11% of silver demand is for photovoltaics (solar panels).
- ~19% of silver demand is for electrical applications. Shift to a low carbon economy involves increase in electrical componentry, including electrical vehicles.
- Silver is an important component in the buildout of 5G networks, the next major evolution in communication technology.
- Silver has medical and sanitary applications because of its anti-bacterial properties.

APPENDIX

2024 OPERATING OUTLOOK

	Silver Production (million ounces)	Gold Production (thousand ounces)	Cash Costs (\$ per ounce) ⁽¹⁾	AISC (\$ per ounce) ⁽¹⁾
Silver Segment:				
La Colorada (Mexico)	5.3 – 5.7	2	16.60 - 19.30	21.00 - 24.00
Cerro Moro (Argentina)	3.2 – 3.5	93 – 115	3.20 - 6.70	8.00 - 11.50
Huaron (Peru)	3.5 – 3.8	–	9.30 - 11.20	15.25 - 17.25
San Vicente (Bolivia) ⁽²⁾	2.9 – 3.1	–	15.30 - 16.60	17.30 - 18.30
Silver Segment Consolidated	14.9 – 16.1	95 – 117	11.70 – 14.10	16.00 – 18.50
Gold Segment:				
Jacobina (Brazil)	–	185 – 203	970 - 1,050	1,250 - 1,350
El Peñon (Chile)	3.6 – 3.9	120 – 135	950 - 1,030	1,200 - 1,300
Timmins (Canada)	–	125 – 135	1,530 - 1,630	1,830 - 1,950
Shahuindo (Peru)	0.2 – 0.3	122 – 144	970 - 1,050	1,550 - 1,650
La Arena (Peru)	–	83 – 95	1,675 - 1,775	1,675 - 1,775
Minera Florida (Chile)	0.4 – 0.5	85 – 96	1,410 - 1,550	1,650 - 1,800
Dolores (Mexico)	1.9 – 2.2	65 – 75	1,275 - 1,375	1,275 - 1,375
Gold Segment Consolidated	6.1 – 6.9	785 – 883	1,165 – 1,260	1,475 – 1,575
Total Consolidated Production	21.0 – 23.0	880 – 1,000		

Consolidated Base Metal Production

Zinc (kt)	42 – 46
Lead (kt)	19 – 22
Copper (kt)	4

Note: Please rerefer to the forward-looking cautionary language on pages 2 and 3 of this presentation.

- Cash Costs and AISC are non-GAAP measures. Please refer to the section "Alternative Performance (Non-GAAP) Measures" of the MD&A for the period ended September 30, 2023 for a detailed description of these measures. The AISC forecast assumes metal prices of \$23.50/oz for silver, \$1,950/oz for gold, \$2,500/tonne (\$1.13/lb) for zinc, \$2,150/tonne (\$0.98/lb) for lead, and \$8,300/tonne (\$3.76/lb) for copper; and average annual exchange rates relative to 1 USD of 17.50 for the Mexican peso ("MXN"), 3.75 for the Peruvian sol ("PEN"), 980.00 for the Argentine peso ("ARS"), 7.00 for the Bolivian boliviano ("BOB"), \$1.36 for the Canadian dollar ("CAD"), \$850.00 for the Chilean peso ("CLP") and \$5.00 for the Brazilian real ("BRL").
- San Vicente data represents Pan American's 95.0% interest in the mine's production.

2024 CAPITAL EXPENDITURE & OPERATING FORECAST

Project capital invested to advance strategic goals:

- Upgrading processing plant at Jacobina
- Continued exploration and in-fill drilling on the La Colorada Skarn project, advancing engineering work for the Skarn project, and installing two high-capacity fans in mid-2024 as part of the new ventilation structure
- Completion of the tailings filtration plant and dry-stack storage facility at Huaron
- Stage six tailings storage facility at Timmins and Bell Creek paste fill plant

	Expenditures (\$ millions)
Sustaining Capital	
La Colorada (Mexico)	22.5 – 23.0
Cerro Moro (Argentina)	14.0 – 15.5
Huaron (Peru)	17.5 – 18.5
San Vicente (Bolivia) ⁽¹⁾	4.5 – 5.5
Jacobina (Brazil)	53.0 – 55.0
El Peñon (Chile)	30.0 – 32.0
Timmins (Canada)	39.0 – 40.0
Shahuindo (Peru)	76.0 – 80.0
La Arena (Peru)	18.0 – 19.0
Minera Florida (Chile)	20.0 – 21.0
Dolores (Mexico)	0.5 – 0.5
Sustaining Capital Sub-total	295.0 – 310.0
Project Capital	
La Colorada Projects (Mexico)	25.0 – 26.0
Huaron Projects (Peru)	30.0 – 31.0
Timmins Projects (Canada)	11.0 – 12.5
Jacobina Projects (Brazil)	14.0 – 15.5
Project Capital Sub-total	80.0 – 85.0
Total Capital Expenditures	375.0 – 395.0
Reclamation Expenditures	35.0 – 40.0
General & Administrative	70.0 – 75.0
Care & Maintenance	25.0 – 30.0
Regional Greenfield Exploration⁽²⁾	10.0 – 12.0
Taxes Paid	95.0 – 100.00

Note: Please rerefer to the forward-looking cautionary language on pages 2 and 3 of this presentation.

1. Capital expenditures and reclamation expenditures at San Vicente are shown at a 100% ownership.

2. Expenditures relating to near-mine exploration targeting reserve replacement are included in the sustaining capital and project capital estimates provided above.

SUSTAINABILITY GOVERNANCE AND MANAGEMENT

// Structure and Accountability

BOARD OF DIRECTORS

- The Communities and Sustainable Development (CSD) Committee reviews the Company's sustainability and ESG performance.
- The Health, Safety, and Environment (HSE) Committee provides policy direction and oversight of the performance on safety and technical matters relating to the environment.
- The Nominating and Governance Committee reviews and provides direction on the Company's governance practices.
- The Human Resources and Compensation Committee assists the Board in fulfilling its responsibilities relating to human resources and compensation issues.

CORPORATE MANAGEMENT TEAM

- Our CEO and senior leadership direct and oversee strategy, programs, initiatives, and performance related to communities, health and safety, environment and human resources. They also monitor sustainability indicator performance on a monthly basis.
- The ESG Management Committee supports the Company in fulfilling its ESG management responsibilities and enhancing its ESG performance.

COUNTRY MANAGERS

- Oversee and manage sustainability in each of the countries where we operate.

MINE MANAGERS

- Implement sustainability programs and initiatives and supervise teams responsible for community relations, environment, safety, and human resources.

¹ Lost time injury frequency (LTIF) and lost time injury severity (LTIS) targets.

² Significant Environmental Incidents ("SEIs").

³ Inclusion & Diversity by percentage of women employees in the total workforce.

⁴ Level of performance of Mining Association of Canada's TSM standard.

ONTARIO, CANADA

TIMMINS

// Two producing mines in prolific Canadian mining camp

- 100% owned and operated
- Comprises two underground gold mines, Timmins West and Bell Creek, which both feed the Bell Creek mill
- Throughput capacity of ~6,000 tpd producing doré
- Exploration success has extended mine life

Gold Production (Koz)

Mineral Reserves & Resources

	Tonnes (Mt)	Grade Au (g/t)	Contained Metal Au (koz)
P&P Reserves	9.7	2.87	893
M&I Resources	4.9	2.63	418
Inferred Resources	3.8	3.11	384

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

CHIHUAHUA, MEXICO

DOLORES

// Large gold / silver Mine

- 100% owned and operated
- Mining is by open pit and uses conventional cyanide heap leaching to produce gold and silver doré
- Average throughput capacity of 20,000 tpd

Silver & Gold Production

Mineral Reserves & Resources

	Tonnes (Mt)	Grade		Contained Metal	
		Ag (g/t)	Au (g/t)	Ag (Moz)	Au (koz)
P&P Reserves	7.6	18	0.53	4.4	131
M&I Resources	6.2	28	0.44	5.5	86
Inferred Resources	1.3	40	1.18	1.7	50

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

ZACATECAS, MEXICO

LA COLORADA

// Pan American's largest silver producing mine

- 100% owned and operated underground mine
- Expansion completed in 2017 – new mine shaft and sulphide processing plant
- Currently producing silver-gold doré bars from a conventional cyanide leach plant for the oxide ore, and silver-rich lead and zinc concentrates from a flotation plant treating sulphide ore

Silver Production (Moz)

Mineral Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Au (g/t)	Pb (%)	Zn (%)	Ag (Moz)	Au (koz)	Pb (kt)	Zn (kt)

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

LA LIBERTAD, PERU

LA ARENA

// Gold mine with sulphide expansion potential (La Arena II)

- 100% owned and operated open pit gold mine producing doré
- Run-of-mine heap leach currently processing ~36,000 tpd
- Exploration success has extended mine life

Gold Production (Koz)

Mineral Reserves & Resources

	Tonnes (Mt)	Grade Au (g/t)	Contained Metal Au (koz)
P&P Reserves	32.6	0.33	343.1
M&I Resources	3.3	0.19	20.6
Inferred Resources	5.8	0.23	43.4

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

PASCO, PERU

HUARON

// Polymetallic silver mine

- 100% owned and operated underground mine
- Average throughput capacity of ~2,500 tpd using flotation technology to produce silver in copper, lead, and zinc concentrates

Silver Production (Moz)

Mineral Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Cu (%)	Pb (%)	Zn (%)	Ag (Moz)	Cu (kt)	Pb (kt)	Zn (kt)

M&I Resources	3.2	176	0.30	1.90	3.09	18.4	10	62	100
Inferred Resources	5.9	164	0.35	1.76	2.87	31.2	21	104	170

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

BAHIA, BRAZIL

JACOBINA

// Large gold mine with significant growth potential⁽¹⁾

- 100% owned and operated underground gold mine producing doré via a conventional leaching process
- Throughput of ~8,400 tpd at gold recovery rates approaching 96%

Gold Production (koz)⁽¹⁾

Mineral Reserves & Resources

	Tonnes (Mt)	Grade Au (g/t)	Contained Metal Au (koz)
P&P Reserves	48.3	2.02	3,143
M&I Resources	94.4	1.55	4,704
Inferred Resources	40.1	1.56	2,015

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

1. Please see Yamana Gold's SEDAR profile for further information.
 2. 2023 production reflects the nine-month period from March 31, 2023 to December 31, 2023 following Pan American's acquisition of Yamana Gold Inc.

POTOSÍ, BOLIVIA

SAN VICENTE

// Polymetallic silver mine

- 95% owned and operated underground mine
- Average throughput capacity of ~950 tpd utilizing a standard flotation process to produce silver-zinc and silver-lead concentrates
- Mechanization efforts, enhanced mine dilution controls and improvements in site infrastructure underway to lower production costs

Silver Production (Moz)

Mineral Reserves & Resources

	Tonnes (Mt)	Grade				Contained Metal			
		Ag (g/t)	Cu (%)	Pb (%)	Zn (%)	Ag (Moz)	Cu (kt)	Pb (kt)	Zn (kt)
P&P Reserves	1.4	310	0.31	0.28	3.49	14.6	4	4	51
M&I Resources	1.1	204	0.19	0.23	2.62	7.0	2	3	28
Inferred Resources	1.5	188	0.22	0.27	2.63	9.2	3	4	40

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

ANTOFAGASTA, CHILE

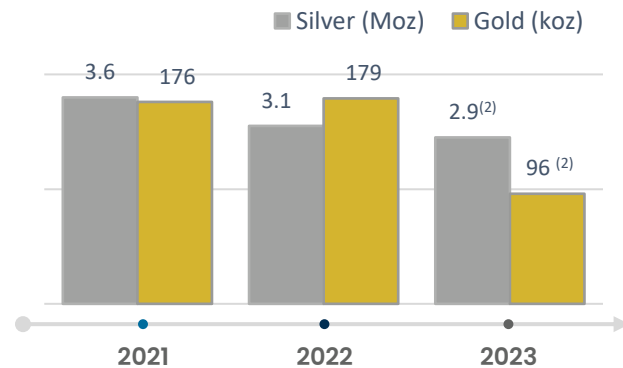

EL PEÑON

// Large gold / silver Mine

- 100% owned and operated underground gold and silver mine producing gold and silver doré
- The mine has been in operation since 1999 and has consistently replaced ounces mined

Silver & Gold Production⁽¹⁾

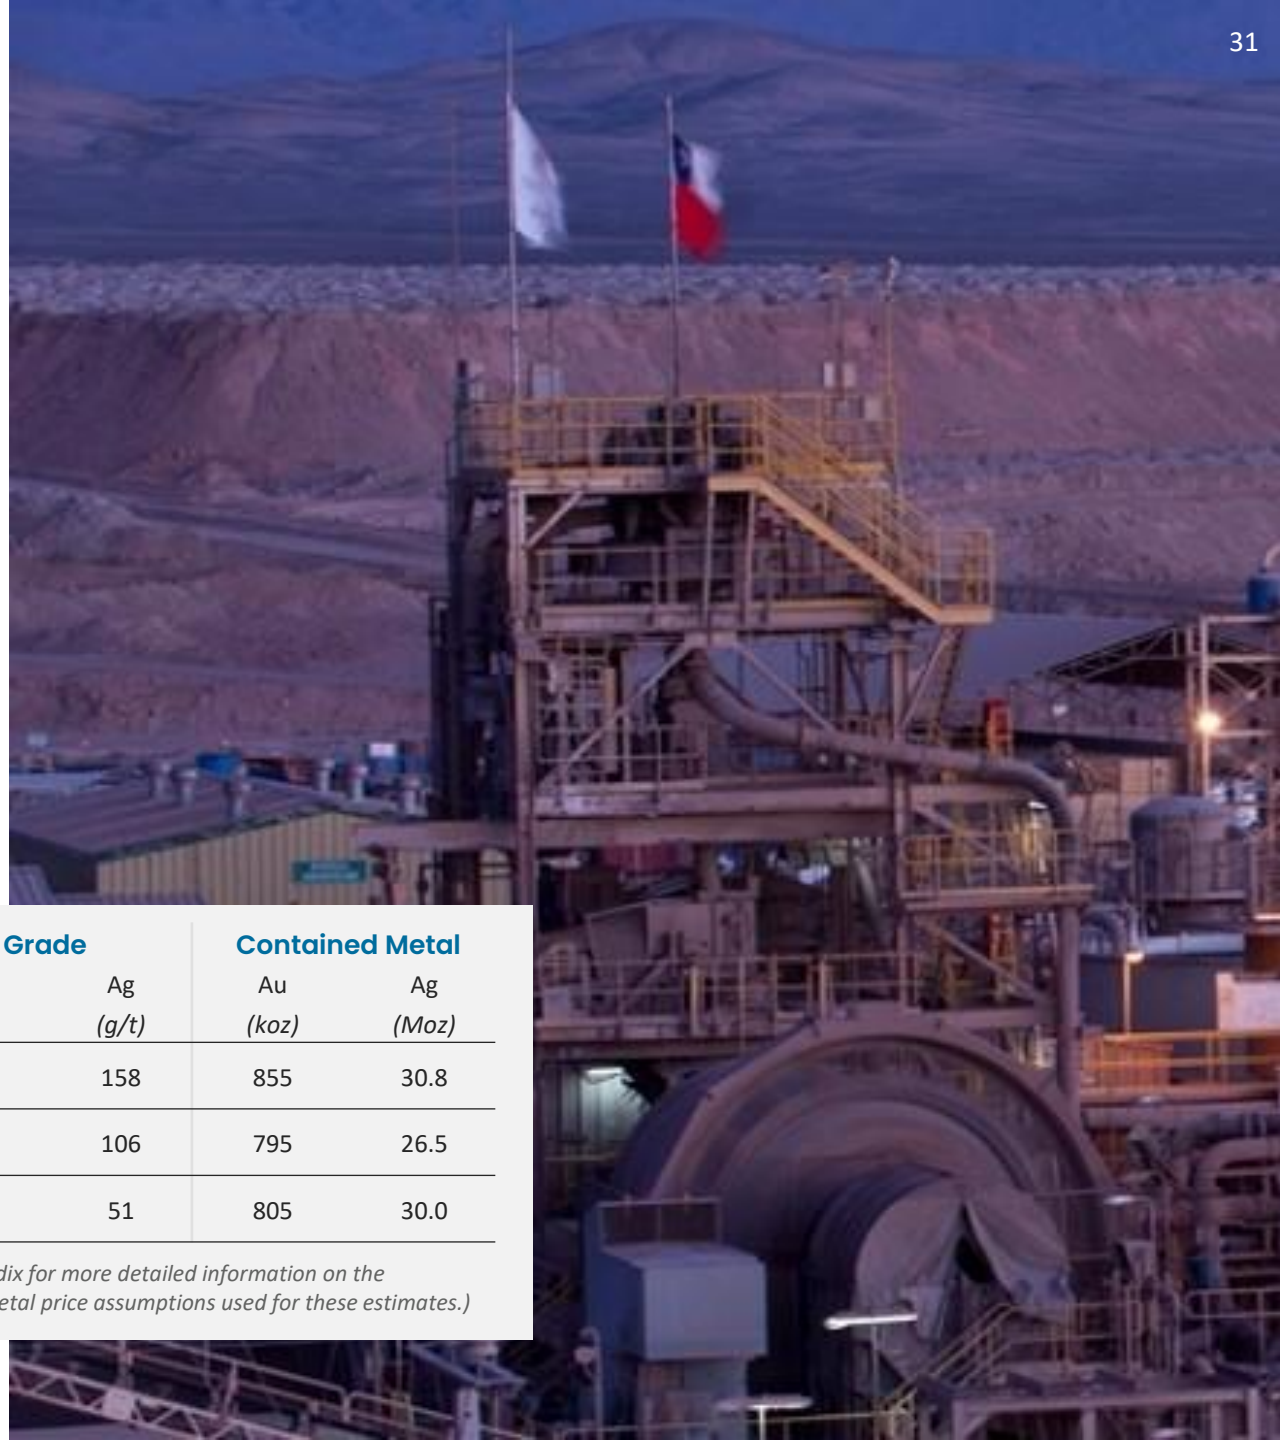

Mineral Reserves & Resources

	Tonnes (Mt)	Grade		Contained Metal	
		Au (g/t)	Ag (g/t)	Au (koz)	Ag (Moz)
P&P Reserves	6.1	4.38	158	855	30.8
M&I Resources	7.8	3.19	106	795	26.5
Inferred Resources	18.5	1.36	51	805	30.0

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

1. Please see Yamana Gold's SEDAR profile for further information.
 2. 2023 production reflects the nine-month period from March 31, 2023 to December 31, 2023 following Pan American's acquisition of Yamana Gold Inc.

LA LIBERTAD, PERU

LA ARENA II

// 100% owned, undeveloped copper porphyry

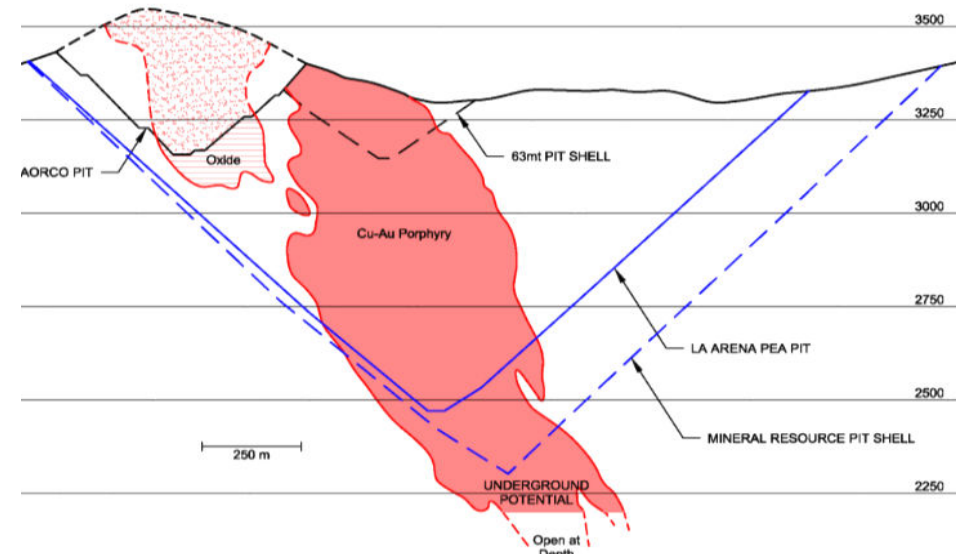

Mineral Resources¹

(as of June 30, 2023)

	Tonnes (Mt)	Grade		Contained Metal	
		Au (g/t)	Cu (%)	Au (koz)	Cu (kt)
M&I Resources	708.7	0.23	0.37	5,300	2,633
Inferred Resources	68.2	0.21	0.29	455	159

Based on Tahoe PEA February 2018²

Mine Type	PEA study projects large Open Pit
Processing	Flotation Processing Plant to be constructed
Products	Copper Concentrate (Doré from smaller oxide resource)
Capacity	Projected to be 80,000 tpd
Modeled Mine Life	21 Year Production Life
Deposit Type	Porphyry

Model Highlights & Key Assumptions

LT Gold Price	1,300 US\$/oz	Ave. Au Sulphide Grade	0.24 g/t
LT Copper Price	3.30 US\$/lb	LOM Average Cu Mill Recovery Sulphide	87%
LOM Average Milled	28.8 Mtpa	LOM Average Au Mill Recovery Sulphide	60%
Initial Capital	1,346 US\$M	LOM Metal Production – Copper Concentrate	4,465 Mlbs
Sustaining Capital	1,093 US\$M	LOM Metal Production – Gold in Copper Concentrate	2,790 Koz
Avg. Annual Operating Costs	395 US\$M	LOM Gold Doré Production	575 Koz
Ave. Cost Per Tonne Processed	12.87 US\$/mt	NPV At 8%	823.8 US\$M
Sulphide Milled	616.4 Mt	IRR	14.7%
Ave. Cu Sulphide Grade	0.38%	Ave. Annual After Tax Cash Flow	273 US\$M

- The expansion of the current La Arena pit has resulted in the removal of a small portion of the La Arena II resources from those reported in the Tahoe 2018 PEA.
- Reference is made to the Technical Report on the La Arena Project, Peru dated February 20, 2018 prepared for Tahoe Resources Inc., a copy of which is filed under the company profile of Tahoe Resources Inc. on SEDAR at www.sedar.com. This technical report contains a preliminary economic assessment of the La Arena II copper-gold porphyry project. Preliminary economic assessment is preliminary in nature, and includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves. There is no certainty that the preliminary economic assessment will be realized. As of the date of this presentation, the Qualified Persons named in this presentation are not aware that there is any new material scientific or technical information that would make this disclosure relating to the preliminary economic assessment to be inaccurate or misleading.

CHUBUT, ARGENTINA

NAVIDAD

// One of the largest undeveloped primary silver deposits

- 100% owned silver project
- Project comprises 8 individual mineral deposits in 3 separate mineralized trends
- Scalable production profile with high-grade mineralization at surface
- Development contingent on provincial mining law change

Mineral Resources

	Tonnes (Mt)	Grade			Contained Metal		
		Ag (g/t)	Cu (%)	Pb (%)	Ag (Moz)	Cu (kt)	Pb (kt)
M&I Resources	155.2	127	0.06	0.86	632.4	71	1,326
Inferred Resources	45.9	81	0.02	0.57	119.4	9	262

(as of June 30, 2023; see presentation Appendix for more detailed information on the Company's reserves and resources and the metal price assumptions used for these estimates.)

ZACATECAS, MEXICO

LA COLORADA SKARN - MINERAL RESOURCE ESTIMATE

Mining Method	Resource Classification	Tonnes (millions)	Zn (%)	Pb (%)	Ag (g/t)	Zn (Mt)	Pb (Mt)	Ag (Moz)
Sub-level Caving (SLC)	Indicated	173.6	2.79	1.32	33	4.8	2.3	183
	Inferred	103.6	2.47	1.03	35	2.6	1.1	116

Notes:

- The effective date of the mineral resources estimate is December 15, 2023. The geological model was completed in December 2022 and diamond drilling from 2023 is not included in this estimate.
- Estimation and reporting of mineral resources were carried out in accordance with Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") guidelines.
- Mineral resources have been classified into indicated and inferred confidence categories.
- Mineral resources have reasonable prospects for eventual economic extraction demonstrating sufficient spatial continuity of mineralisation constrained within a potentially mineable shape. Mineral resources that are not mineral reserves do not have demonstrated economic viability. No mineral reserves are reported at this time for the La Colorada Skarn project.
- Prices used to report mineral resources were: US\$22 per ounce of silver, US\$2,800 per tonne of zinc and US\$2,200 per tonne of lead.
- An estimated NSR (in US\$/t) was calculated using metallurgical recoveries of 87.4% Ag, 88% Pb and 93% Zn with mineral concentrate qualities of 67% Pb in lead concentrate and 60% Zn in zinc concentrate, obtained from metallurgical testing. Estimates for transport, payability and refining/selling costs, based on experience and long-term views of the marketing, treatment and refining of these types of mineral concentrates, were included.
- Reasonable prospects for eventual economic extraction were assessed by determining the total in-situ tonnes and metal grades constrained inside volumes that are based on a SLC mining method. To determine the constraining SLC shapes an initial elevated cutoff value of \$50/t NSR was applied. Then geotechnical, geometry and caving rules were applied to ensure practical mining shapes and sequences were achieved. Each level, in each zone, was individually tested for overall economics, and then tested as part of the caving sequence. The resulting constraining shapes were then considered to be practical mining outlines. The tonnes and grades are inclusive of the must-take low grade material within the volume. No other mining recovery, ring recovery, dilution or mineral losses have been applied.
- This mineral resource estimate was prepared under the supervision of, or was reviewed by, Christopher Emerson, FAusIMM, Vice President Exploration and Geology, who is a Qualified Person as that term is defined in NI 43-101.
- Grades are shown as contained metal before mill recoveries are applied. The Company has undertaken a verification process with respect to the data disclosed in this news release.
- A total of 298 diamond drill holes with a total length of 242,000 metres were used in the geological interpretation and resource estimate. Several old historic drill holes were included in the modeling. Drilling of the La Colorada Skarn deposit has been completed from both surface and underground drill platforms.
- All drill hole samples used in the mineral resource estimate have been previously reported in news releases dated October 23, 2018, February 21, 2019, May 8, 2019, August 1, 2019, October 30, 2019, February 13, 2020, August 4, 2020, May 12, 2021, November 10, 2021, February 24, 2022, and May 9, 2022.

La Colorada Skarn PEA Results Summary *(50,000 tpd model)*

Construction period	6 years
Production mine life	17 years
Production rate	50 ktpd (or 18.25 Mtpa)
Mineable inventory	284.7 million tonnes
Average annual silver produced first 10 years	17.2 million ounces
Average annual zinc produced first 10 years	427 thousand tonnes
Average annual lead produced first 10 years	218 thousand tonnes
Unit operating costs	\$40.88 per tonne
Total revenue	\$23,853 million
Initial capital	\$2,829 million
Total LOM sustaining capital	\$951 million
Total LOM operating cost	\$11,638 million
Cumulative after-tax cash flow	\$5,689 million
After-tax NPV _(5%)	\$2,182 million
After-tax NPV _(6.5%)	\$1,572 million
After-tax NPV _(8%)	\$1,087 million
After-tax IRR	14%
Payback period (after-tax, undiscounted)	4.3 years

Notes:

1. Assumes metal prices of \$2,800 per tonne of zinc, \$2,200 per tonne of lead, and \$22.00 per ounce of silver.
2. The PEA is preliminary in nature, includes inferred mineral resources that would be considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment will be realized.
3. For additional information, including a sensitivity analysis, please refer to the news release dated December 18, 2023.

- (1) See table below entitled "Metal price assumptions used to estimate mineral reserves and mineral resources as at June 30, 2023".
- (2) Mineral resources are reported exclusive of mineral reserves.
- (3) Tables have been updated to reflect the sales of MARA (completed on Sept. 20, 2023), Morococha (completed on Sept. 22, 2023), and Jeronimo (completed on Nov. 6, 2023).
- (4) Figures for the La Colorada Skarn have not been updated for the estimated mineral resource provided in the news release dated December 18, 2023.
- (5) This information represents the portion of mineral resources attributable to Pan American based on its ownership interest in the operating entity as indicated.
- (6) Totals may not add up due to rounding. Total average grades of each metal are with respect to those mines that produce the metal.

METAL PRICE ASSUMPTIONS USED TO ESTIMATE MINERAL RESERVES AND RESOURCES

as of June 30, 2023

Mine	Category	Ag US\$/oz	Au US\$/oz	Cu US\$/t	Pb US\$/t	Zn US\$/t
Huaron	All categories	19.00	1,300	7,000	2,000	2,600
Morococha	All categories	19.00	1,300	7,000	2,000	2,600

	Resources		900			
MARA Agua Rica	Reserves	18.00	1,250	6,613		
	Resources	24.00	1,600	8,818		
MARA Alumbrera	Resources		1,300	6,239		
Arco Sul	Resources		1,250			
La Pepa	Resources		1,650			
Lavra Velha	Resources		1,650			

GENERAL NOTES APPLICABLE TO THE FOREGOING TABLES:

All mineral reserves and mineral resources have been estimated in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and National Instrument 43-101. Mineral resources are reported exclusives of mineral reserves.

Pan American does not expect these mineral reserve and mineral resource estimates to be materially affected by metallurgical, environmental, permitting, legal, taxation, socio-economic, political, and marketing or other relevant issues.

The Company has undertaken a verification process with respect to the data disclosed in this presentation. The mineral resource and mineral reserves databases comprising drilling and, in some cases, surface and underground sampling, have been compiled at each of the Pan American mine sites by the qualified staff. All the assay data used in the resource evaluation provided by each of the mines has been subjected to the industry standard quality assurance and quality control ("QA/QC") program including the submission of certified standards, blanks, and duplicate samples. The results are reviewed monthly by management. The results of the QA/QC samples submitted for the resource databases demonstrate acceptable accuracy and precision. The Qualified Person is of the opinion that the sample preparation, analytical, and security procedures followed for the samples are sufficient and reliable for the purpose of this mineral resource and mineral reserve estimates. Pan American is not aware of any drilling, sampling, recovery or other factors that could materially affect the accuracy or reliability of the data reported herein.

For additional information regarding Pan American's material mineral properties prior to the completion of the acquisition of Yamana, including detailed information concerning associated QA/QC and data verification matters, the key assumptions, parameters and methods used by Pan American to estimate mineral reserves and mineral resources, and for a detailed description of known legal, political, environmental, and other risks that could materially affect the Pan American's business and the potential development of the Pan American's mineral reserves and mineral resources, please refer to Pan American's Annual Information Form dated February 22, 2023, filed at www.sedarplus.ca, or Pan American's most recent Form 40-F filed with the United States Securities and Exchange Commission (the "SEC").

For further information about the material mineral projects acquired pursuant to the acquisition of Yamana, please refer to Yamana's Annual Information Form dated March 29, 2023, filed at www.sedarplus.ca or Yamana's most recent Form 40-F filed with the SEC.

Quantities and grades of contained metal are shown before metallurgical recoveries.

Technical information contained in this presentation with respect to Pan American has been reviewed and approved by Sébastien Bernier P. Geo., Senior Director, Reserves and Resources, Christopher Emerson, FAusIMM., Vice President of Exploration and Geology, and Martin Wafforn, P.Eng., Senior Vice President Technical Services and Process Optimization, who are each Qualified Persons for the purposes of National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101").

Pan American Silver Corp. is authorized by The Association of Professional Engineers and Geoscientists of the Province of British Columbia to engage in Reserved Practice under Permit to Practice number 1001470.

Please refer to the cautionary information on mineral reserves and mineral resources on page 3 of this presentation.
